

1. Design of oxypnictide superconductors, DST, 2009-2012.
2. Design of new dielectric materials for microwave applications, BRNS, , 2009-2012.
3. Nanocrystalline metal borides , DST (Nano mission) 2010-2013.
4. Design of anisotropic semiconducting core-shell nanostructures, CSIR, (2012-2015).
5. Nanocomposites and core-shell nanostructures : electronic and optical properties , Nanomission (Co-P.I) 2011-2016.
6. Leaf on a chip (DST Solar initiative) (Co-P.I.), 2011-2014.
